Career Summary

Software Engineer with 2+ years of industry experience in **Java**, **Object-Oriented Programming**, **backend development**, **REST APIs**, **CI/CD**, **debugging**, **testing**, and enterprise application support. Experienced in building and maintaining **business rules**, **decision workflows**, and automation tooling using **Java**, **Python**, **MySQL**, and **GitHub**. Hands-on with **Spring Boot**, **Kafka**, **MongoDB**, **Docker**, **FastAPI**, and AI-assisted development through production and personal backend projects.

Experience

Cognizant Technology Solutions – Travelers Insurance **Bengaluru, India**
Software Development Engineer *Jul 2025 – Present*

- Own teams **GitHub PR reviews**, **UAT deployments**, Jira board updates, sprint tracking, and release support while maintaining application stability.
- Designed and integrated an **AI-driven Python automation layer** for Jira intake, rule changes, artifact setup, and XML/SOAP testing, reducing repetitive manual effort and code duplication by **40%**.
- Applied **REST API integration**, **CI/CD practices**, debugging, monitoring, and deployment support for backend services and rule-based workflows.
- Collaborated with QA, business, and engineering teams for **unit testing**, **integration testing**, **UAT**, issue analysis, defect fixes, and production readiness.

Cognizant Technology Solutions – Travelers Insurance **Bengaluru, India**
Junior Software Developer *Jul 2024 – Jun 2025*

- Developed, designed, and maintained **business logic** and automation rules using **Java** and **IBM ODM Rule Designer** in **Eclipse** for insurance decision workflows.
- Built and enhanced **decision tables**, rule flows, validations, and backend rule logic based on business requirements and technical design changes.
- Kept post-deployment bug rate under **0.1%** by writing clean, tested rule logic and validating changes before production releases.
- Worked across the full sprint lifecycle including **impact analysis**, coding, code review, testing, deployment, documentation, and defect resolution.

Cognizant Technology Solutions – GenC Internship **Bengaluru, India**
Data Analyst Intern / TIBCO BusinessWorks Trainee *Jan 2024 – Jun 2024*

- Worked with **JMS**, **HTTP**, **SOAP/REST web services**, **XML/XSD**, data mapping, TIBCO EMS, logging, and exception handling.
- Used **MySQL** and JDBC for data validation and integration flows, gaining practical exposure to backend systems and enterprise application support.

Projects

E-Commerce Order Management System – AxeDrobe GitHub | Live
Java 17, Spring Boot 3, REST APIs, MySQL, Kafka, JWT, JPA/Hibernate, Docker, React

- Built a **microservices-based e-commerce backend** with user, product, order, inventory, and notification services for scalable order processing.
- Implemented **REST APIs**, MySQL persistence, JPA/Hibernate ORM, **JWT authentication**, **Kafka event flow**, Docker setup, and API documentation.
- Developed frontend integration for **AxeDrobe** and connected order workflows with backend services for product browsing and order management.

AuraTube GitHub | Live
Python, FastAPI, React, Vite, FFmpeg, yt-dlp, Google APIs, Server-Sent Events

- Built a full-stack video utility application with **React frontend** and **FastAPI backend** to process YouTube video and playlist workflows which downloads or Save to GDrive.
- Integrated **yt-dlp**, **FFmpeg**, Google Drive upload support, OAuth-based configuration, and real-time progress tracking using **Server-Sent Events**.

Skills

Java · Spring Boot · Python · MySQL · React · PostgreSQL · Kafka · CI/CD · GitHub · Jira · Docker · Blender

Education

Dr. B.C. Roy Engineering College **Durgapur, West Bengal**
B.Tech in Mechanical Engineering, CGPA: 8.8/10 *2019 – 2023*

Achievements

- Delivered **production rule changes**, sprint fixes, PR reviews, and UAT deployments for enterprise insurance workflows.
- Built **AI-assisted internal automation** to reduce repetitive rule development and testing effort by **40%**.
- Developed backend-focused projects using **Java**, **Spring Boot**, **Kafka**, **Docker**, **FastAPI**, React, and database-driven architecture.
