## OBJECTIVE

SDE with a strong foundation in Java, Spring Boot, and MySQL. Skilled in problem-solving, teamwork, and managing projects. Eager to collaborate with a good team and always ready to learn new things in a fast-paced environment.

## SKILLS

**Languages: Java (primary) · Python (scripting) · MySQL · HTML**
**Skills: Backend Development · CI/CD Pipelines**
**Dev: Spring Boot · REST API · IBM ODM (Eclipse)**
**Personal Learnings: Kotlin · Kafka · Javascript · React**

## EXPERIENCE

Cognizant — Travelers Insurance *Bengaluru, IN*
**Software Development Engineer**(Hybrid) Jul 2025 - Present

- Owning team **GitHub PR Reviews** and **UAT deployments**, managing **Jira board** while maintaining application health and stability.
- Designed and integrated an **AI-driven Python automation** layer to handle Jira intake, rule changes, and XML testing; manual efforts and code duplication by 40% reduction. Collaborated with other teams to implement **Python automation** support for **unit testing, integration testing**, and **user acceptance testing** (**UAT**), ensuring high-quality and faster delivery in **SOAP**.
- Applied **REST API** integration and **CI/CD** practices for monitoring and deployment of backend services.

**Junior Software Developer** Jul 2024 - Jun 2025

- Developing design and maintaining business logic and automation rules using **Java** and **IBM ODM** rule designer (**Eclipse**), directly impacting insurance decision workflows for clients.
- Kept post-deployment **bug rate under 0.1% by writing clean**, well-tested rule logic before every release.
- Picked up the full sprint workflow from day one writing code, getting it reviewed, testing it, and deploying it.

Cognizant — GenC Intern *Bengaluru, IN*
**Data Analyst Intern** Jan 2024 - Jun 2024

- Worked with tools and protocols such as **TIBCO EMS, JMS, HTTP, SOAP/REST API, XML/XSD, and data mapping**. Implemented process orchestration, logging, and exception handling.
- Used **MySQL** alongside **JDBC** to handle real data during integration flows and understood backend.

## PROJECTS

**E-Commerce-Order-Management System** AxeDrobe — Personal Project · FullStack (GitHub)

- Created a complete **e-commerce website** using **Java**, **Spring Boot**, and **Docker**. Codes are into independent pieces (like **Users, Products,** and **Orders**) so that if one part crashes, the rest of the website stays online.
- Used **Apache Kafka** to handle heavy tasks in the background without slowing down the website. When a customer buys something, it **instantly updates the inventory and sends a confirmation email** behind the scenes. Also developed and maintained web application **frontend** using **React** and **Kotlin**.

Also being a part of the contribution in the open-source technologies project on GitHub. (weatherfast)

## EDUCATION

**BTech in Mechanical Engineering**, Dr. B.C. Roy Engineering College 2019-2023
CGPA - 8.8
