Professional Summary

SDE with experience in developing **backend systems**, **automation workflows**, and **full-stack applications**. Built production-grade API integrations, database driven services, and AI-assisted tools that improved engineering efficiency. Skilled in strong teamwork, quick self learning ability and work feedback, problem solving, ownership, attention to detail, execution, and clear communication while working and collaborate with fast-paced engineering teams.

Technical Skills

Programming Languages: Java (Primary) , Javascript , Python , HTML
Backend: Spring Boot , REST APIs , IBM ODM , AWS
Databases: MySQL , PostgreSQL , MongoDB
DevOps & Tools: Git , GitHub , Jenkins , Docker
Concepts: OOP , Data Structures , System Design Basics , CI/CD , Agile , Debugging

Experience

COGNIZANT · Travelers Insurance Bengaluru, India
Software Development Engineer Jul 2025 – Present

- Created a Spring Boot project for an application upgrade requirement, containerized the setup using Docker, configured Maven dependencies, HTTP, and environment profiles to assist testing, deployment, migration 30% faster.
- Built automation tools for code automation, PR review, and TCO production checkout, **reducing time by 55%**. Designed a Python-based AI automation layer for Jira intake, rule changes, artifact setup, and XML, JSON and SOAP testing, **reducing manual effort by 40% with an independent PowerShell and Swagger UI tool**.
- Managed **PR reviews**, **UAT deployments**, Jira tracking, release monitor, API endpoints integration, CI/CD, monitoring and debugging (root cause analysis); troubleshooting **14 major bugs/issues** along with the team infrastructure-as-code.

Junior SDE Jul 2024 – Jun 2025

- Writing clean Java code for business rules, decision tables, validations, and server-side work flow using IBM ODM Rule Designer while maintaining post-deployment **bug rate under 0.1%** through impact analysis, clean code, routing, testing, code review, and release with continuous improvement solutions.

Software Trainee Jan 2024 – Jun 2024

- Worked on JMS, HTTP, SOAP web services, XML, XSD, data mapping, TIBCO EMS, logging, and exception handling.
- Used MySQL and JDBC for data validation and integration flows, parsing up to 100,000 records per week.

Projects

AxeDrobe · E-Commerce Order Management System – Java, Spring Boot, React, CSS GitHub | Live

- Built full-stack e-commerce order management system with independent user, product, purchase, inventory, notification modules for end-to-end workflow execution.
- Implemented Fast APIs using Java, Spring Boot, Typescript, MySQL, JPA-Hibernate, JWT authentication, oauth login, Kafka event flow communicate, Docker setup, and API documentation.
- Integrated a React frontend with server-side to support product browsing, checkout placement, inventory updates, and scalable SIP communication for the customer.

AuraTube · Video Utility Platform – Python, FastAPI, Angular, Node.js GitHub

- Built a full-stack video utility application using React front-end development and FastAPI layer for YouTube video and playlist workflow execution. Designed applications for handling video requests, handling status updates, file operations, and smooth frontend-backend communication.
- Integrated yt-dlp, FFmpeg, Google APIs, and Server-Sent Events to improve video processing, real-time progress tracking, and Google Drive upload.

Education

Bachelor of Technology in Mechanical Engineering 2023
Dr. B.C. Roy Engineering College, Durgapur, West Bengal
CGPA - 8.8

Certificates

Software Engineer - HackerRank · 2026
AWS Certified Cloud Practitioner - Amazon Web Services · 2025
