Professional Summary

Backend-focused software professional with hands-on experience building Java and Spring Boot applications, integrating REST APIs, automating engineering workflows, and supporting production releases. Delivered measurable improvements in deployment speed, testing effort, and code-review efficiency through Python automation, Docker, CI/CD, Kafka, MySQL, and root-cause analysis. Known for combining strong execution, problem-solving, and ownership to build reliable, maintainable, and scalable software.

Technical Skills

Programming Languages: Java (Primary), Python , HTML
Backend: Spring Boot, REST APIs, IBM ODM, AWS
Databases: MySQL, PostgreSQL, MongoDB

Experience

COGNIZANT · Travelers Insurance - Bengaluru, India July 2025 – Present
Software Development Engineer

- Developed an automated release and deployment solution for Integration, UAT, and production environments, standardizing the deployment activities and accelerating production-day application validation while reducing manual effort and operational risk.
- Developed and containerized a Spring Boot application for a platform upgrade using Docker, Maven, HTTP integrations, environment specific profiles, improving testing, deployment, and migration efficiency by **30%**.
- Built automation tools for code generation and pull request analysis, **reducing processing time by 55%**; developed a Python-based AI assisted workflow for Jira intake, business rule changes, artifact configuration, and XML, JSON, and SOAP testing through PowerShell automation and Swagger UI, **reducing manual effort by 40%**.
- Contributed to REST API integrations, pull request reviews, CI/CD workflows, UAT deployments, Jira tracking, monitoring, debugging, log analysis, and root cause analysis to resolve **14 application errors and deployment issues** with cross-functional teams.

COGNIZANT · Travelers Insurance - Bengaluru, India July 2024 – June 2025
Junior Software Development Engineer

- Developed and maintained Java-based business rules, decision tables, validations, routing logic, and server-side workflows using IBM ODM Rule Designer, maintaining a post-deployment **defect rate below 0.1%** through impact analysis, clean coding practices, testing, code reviews, and controlled releases.

COGNIZANT · Unum OS - Bengaluru, India Jan 2024 – June 2024
Software Trainee

- Developed application integration workflows using JMS, HTTP, SOAP web services, XML, XSD, data mapping, and TIBCO EMS, with structured logging and exception handling to improve reliability and troubleshooting.
- Used MySQL and JDBC for data validation and integration processing, efficiently handling up to **100,000 records per week**.

Projects

AxeDrobe · E-Commerce Order Management System – GitHub | Live

- Built a full-stack e-commerce platform website using five independent services for user authentication, product management, order processing, inventory tracking, and notifications, with secured REST APIs using Spring Security, JWT, and role-based access control.
- Implemented an event-driven order workflow using Apache Kafka, enabling the Order Service to publish events that asynchronously trigger inventory updates and order notifications while keeping services loosely coupled.

AuraTube · Video Utility Platform – GitHub

- Built a full-stack video utility platform using React and FastAPI that processes individual YouTube videos and playlists in multiple resolutions, with REST APIs and Server-Sent Events for real-time progress tracking.
- Engineered a media-processing pipeline to extract formats, download and merge video/audio streams, and upload files to Google Drive using OAuth 2.0 with resumable uploads and automatic local-file cleanup.

Education

Bachelor of Technology in Mechanical Engineering 2023
Dr. B.C. Roy Engineering College, Durgapur, West Bengal
CGPA - 8.8

Certificates

Software Engineer - HackerRank · 2026
AWS Certified Cloud Practitioner - Amazon Web Services · 2025
